EXCLUSIVE HI-TECH AUTOMATED CHILDCARE EXAMINATION TABLE

PediaScaler
automated pediatric table

PediaScaler pediatric examination table offers all the features and benefits you need to give your baby and infant patients the best, most tender care possible.

PediaScaler will accurately and instantly measure the height and the weight of the infant patient and display smartly the result on an interactive touchscreen without the need to walk to another area for examination, or to retrieve supplies.

A hidden automatic rolling paper roll holder and mechanism activated at the end of each examination is yet another convenience.

Main display

BENEFITS

- With its automated features PediaScaler reduces considerably the stress and inconvenience of moving the infant patient.
- Secures active infant patients restricting them from falling.
- Reduces the strain and the stress placed on the physician's back from bending to examine several infant patients.
- All medical instrumentation (stethoscope, otoscope, thermometer...) and scales are centralized within Doctor's hand reach.
- Keeps the physician's hands free by eliminating the need to record examination results on paper.
- The smart visible display enables the parents to follow clearly live examination results.
- The automatic paper roll system rejuvenates and ensures the hygienic condition between each patient examination.
- Gives the clinic a professional hi-tech approach to childcare.
- The tailored custom designed PediaScaler blends in with the clinic's theme and internal decor.
