THE BEST AUTOMATED AND FLEXIBLE QUEUING MANAGMENT SOLUTION

Q-InServer
queuing system

Waiting in lines is something we encounter most of the times.

In a traditional non-queuing environment, customers are left confused as to what line to stand in, what counter to go when called...

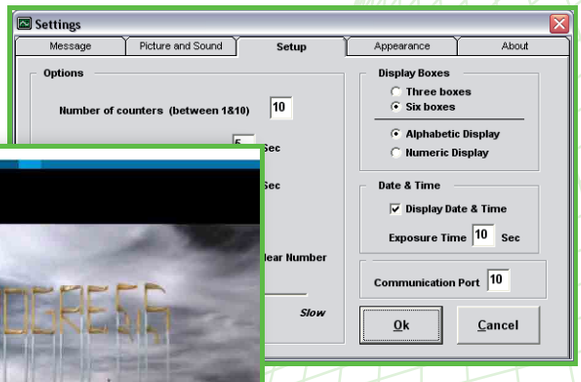

Queuing is the process of moving customers from a central location, such as a lobby or waiting area to a specific place of service, such as a counter or workstation.

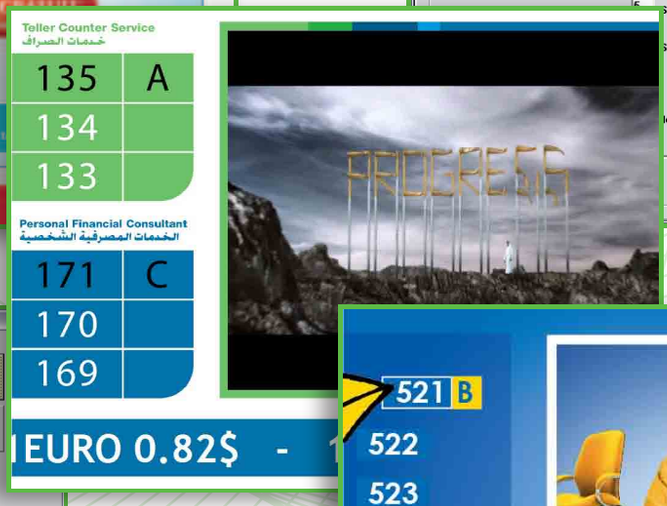

With Q-inServer computerized or conventional solution, you can arrange your queuing problems and satisfy your customers by serving them in the most appropriate and less time consuming way.

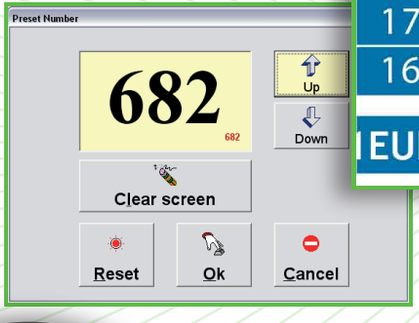

Q-InServer is an organized process of directing and moving customers from a chaotic situation in front of counters or waiting area, to a higher and advanced level of service, in a very orderly manner.
